Live Seafloor Camera Feed Used in Summer Class ^[1]

Submitted by Rory Lattimer Wed, 2012-08-22 00:00

[2]

During the last 3 weeks, the VENUS seafloor camera feed was used in the Biological Oceanography (EOS/BIOL311) summer course at the University of Victoria. Observing live conditions at 300 m depth in the Strait of Georgia [3] was a rather unique experience to the students learning about ocean processes and marine biology in the coastal environment. Every morning Dr. Dower [4] logged onto the camera and conducted a 5-minute long observation of the environment, bringing up the live feed on the big classroom display.
