

## Expedition sails to Endeavour hot vents

Submitted by Virginia Keast Fri, 2014-05-16 13:59

With final preparations underway, Ocean Networks Canada is set to embark on a week-long voyage to NEPTUNE's three deep sea sites: Endeavour, Cascadia Basin, and Clayoquot Slope. This second leg of the Wiring the Abyss 2014 summer expedition will run from May 16-24 with dives running 24/7.

According to Expedition Leader Adrian Round, the CCGS *Tully* plans to depart from the jetty in Pat Bay at 18:00PDT Friday evening. He anticipates dive operations beginning the morning of Sunday 18 May, with the remotely operated underwater vehicle ROPOS touching down on the seafloor at Endeavour around 10:00PDT.

The Endeavour site of the NEPTUNE cabled ocean observatory offers a rare opportunity to see some of the most unusual deep sea communities on our planet.

Beginning May 18, we will be streaming live video through the [Wiring the Abyss 2014 website](#).

The video highlights below are a sneak preview of what you may encounter during a live dive to Endeavour?if you tune in!
