

Earthquake sensors planned for coastal BC

Submitted by Virginia Keast Wed, 2014-05-21 16:09

As part of the Smart Ocean? program, ONC is partnering with researchers from the University of British Columbia. They are developing a cup-sized land sensor that provides a warning up to 90 seconds before the ground-shaking energy of an earthquake arrives. Kate Moran and Benoit Pirenne are interviewed about how this new sensor may complement ONC's seafloor observatories and future plans, in the *Victoria Times Colonist* article: [Sensors will warn of earthquakes affecting Vancouver Island](#).
