

ICSU World Data System ^[1]

Collaborating Institution

In 2014, Ocean Networks Canada became a member of the ICSU World Data System ^[2] (WDS). The World Data System is an Interdisciplinary Body of the International Council for Science (ICSU) created by its 29th General Assembly in Maputo, Mozambique in 2008. ICSU's long-term vision is of:

?a world where excellence in science is effectively translated into policy making and socio-economic development. In such a world, universal and equitable access to scientific data and information is a reality and all countries have the scientific capacity to use these and to contribute to generating the new knowledge that is necessary to establish their own development pathways in a sustainable manner.?

World Data System goals:

- Enable universal and equitable access to quality-assured scientific data, data services, products and information
- Ensure long term data stewardship
- Foster compliance to agreed-upon data standards and conventions
- Provide mechanisms to facilitate and improve access to data and data products
