

The Strait of Georgia Array Comes to the Surface ^[1]

Submitted by Rory Lattimer Wed, 2012-08-15 00:00

[2]

In the first week of August, the VENUS Observatory's Strait of Georgia array suffered a major power fault (see System Status). As a result, the field team retrieved all instruments on the seafloor leaving only the cable and the node frames. It was a challenge to the ship's bosun to pack all the components onto the deck. Once home, we will prepare all instruments for re-deployment upon repair of the fault.
