

# **Setting Up Second Coastal Radar Antenna on VENUS** <sup>[1]</sup>

Submitted by Rory Lattimer Tue, 2012-07-17 00:00

[2]

Paul Macoun (Ocean Networks Canada Engineering team) prepares the second CODAR antenna for installation at our shore station near Vancouver airport. Following the final testing, the antenna will be collecting radial velocity data from the surface waves in the Strait of Georgia.

The first CODAR antenna, installed at the West Shore Terminal, Delta, BC, has been operating since fall 2011. The combined data streams from both antennae will provide measurements of surface waves and currents.
