Visiting scientist to focus on marine geohazard research and data

Submitted by Duncan Lowrie Thu, 2019-10-24 16:21

Dr. Phil Hill, former director at the Geological Survey of Canada’s Pacific division, is ONC’s latest visiting scientist. Hill has a long-standing connection with ONC—he was one of the original principal investigators of ONC’s inshore observatory project proposal and the Delta Dynamics platform—and is looking forward to using ONC data to advance his research on marine geohazards, including submarine landslides and related processes.

Read more about Dr. Hill [here](#). Follow Dr. Hill on Twitter at [@pgcphil](#).
