

Life and Death at 300 Metres ^[1]

Submitted by Rory Lattimer Mon, 2010-07-19 00:00

A juvenile giant Pacific octopus, *Enteroctopus dofleini*, pounces on a passing tanner crab, *Chionoecetes bairdi*. Once the crab is secured the octopus retreats and will consume its meal in the safety of its den. *E. dofleini* is a stealth predator that primarily eats crustaceans, other mollusks and fish. This video was captured on the Strait of Georgia webcam at 300m depth.
