

Information for Mariners – November 2020 ONC Baynes Sound

Project: Baynes Sound Ocean Acidification Mooring, managed by Ocean Networks Canada (ONC) of the University of Victoria, is a surface moored platform for monitoring oceanographic conditions in Baynes Sound (Figure 1). The project is a collaboration between the Department of Fisheries and Oceans, MEOPAR, VIU, and ONC. The mooring consists of a triple anchored 7 m yellow platform, with taut anchor lines running Northwest, Southwest, and East from the float. The system is configured with multiple oceanographic instruments for measuring the water properties as they relate to monitoring ocean acidification. A marine cable extends from a shore station along the ocean bottom to the mooring and a wireless link transmits data to the shore station. The data are then sent to the University of Victoria and are available in real-time from the ONC website: <http://www.oceannetworks.ca/>

What: Marine observatory system (see web site for system details).

When: Latest system and instrument deployments in Baynes Sound: **18 November 2020**

Baynes Sound Mooring

This figure has been produced by the University of Victoria based on Canadian Hydrographic Service (CHS) charts, pursuant to CHS Direct User License No. 2019-1004-1260-UV. The incorporation of data sourced from CHS in these products shall not be construed as constituting an endorsement by CHS of these products. These products do not meet the requirements of the Charts and Nautical Publications Regulations, 1995 under the Canada Shipping Act, 2001. Official charts and publications; corrected and up-to-date, must be used to meet the requirements of those regulations.

Installations:

Name	Latitude	Longitude	Depth [m]	Notice	Description
Mooring	49.48689 N	-124.76933 W	0-40 m	See chart #3527	7 m yellow surface platform equipped with ODAS lights [Y FI(5)20s]. See Figure 1 below for photo.
Northwest Anchor	49.48855 N	-124.76940 W	55 m		Anchor
Southwest Anchor	49.48630 N	-124.76931 W	56 m		Anchor
East Anchor	49.48742 N	-124.76647 W	55 m		Anchor

Cables and Lines: A cable runs from the shore station located on the pier at 49.45754 N, -124.73308 W. From there, it extends subsea to the mooring (See Figure 1).

Contacts: If you have any concerns, or would like further information, please contact either: Ian Kulin, Ocean Networks Canada's Director of Observatory Physical Operations at ikulin@uvic.ca or 250-721-6279 or ONC GIS Specialists at GIS@oceannetworks.ca.
