

Notice to Mariners – December 2019 SMART Oceans/ONC China Creek

Project: The China Creek subsea platform, managed by Ocean Networks Canada (ONC) of the University of Victoria, contains a suite of instruments used for ocean observing. From the dock in China Creek, a marine cable extends along the ocean bottom to small array of oceanographic instrument systems. A wireless link transmits data to the shore station. The data and images are then sent back to the University of Victoria. Project status, system information, and data are available from the ONC website: <http://www.oceannetworks.ca>

What: Marine cables and observatory systems (see web site for system details).

When: Latest system and instrument deployments in China Creek: **26 November 2019**

This figure has been produced by the University of Victoria based on Canadian Hydrographic Service (CHS) charts, pursuant to CHS Direct User License No. 2015-0223-1260-V.

Name	Latitude	Longitude	Depth [m]	Notices	Description
Instrument Platform	49°09.2606' N	124°48.1837' W	109 m	NW-P-1758-19	2 m grey rectangular platform
